

## Arctic Gateway Group Announces New Management Team

March 23, 2021

The Arctic Gateway Group Board of Directors, along with the OneNorth communities are very pleased to announce the appointment of Sheldon Affleck as Chief Executive Officer, Arctic Gateway Group effective immediately.

Sheldon joins the Arctic Gateway Group at an exciting time of our transition to community ownership. Mr. Affleck co-founded Mobil Grain and served as President from 2004 until its acquisition by AGT Foods in 2015. During his tenure with Mobil he developed a unique, bulk shipping model utilizing shortline railroads as the backbone of a very efficient and profitable grain procurement and export business. Sheldon's extensive engineering experience includes designing, planning, and overseeing two major projects for AGT. The first being Intermobil, a state of the art privately operated all electric inland container terminal for CN at Regina, SK and the AGT Delisle mega grain cleaning facility.

In 2018, Sheldon was tasked with planning and coordinating the Hudson Bay Railway (HBR) washout repair for Fairfax/AGT using geocell technology. This unique design was successful in returning the HBR back to operation in 35 days after the work began.

Also joining Sheldon in AGG's new Management Team is Daren Young who will serve as Chief Financial Officer. As the former CFO of Mobil since 2005, Daren led the way in developing unique systems combining grain marketing and railway requirements in a single platform.

Bill Drew also joins the team in an operational capacity. He brings 30 years of experience in managing western grain operations for CN and transportation logistics for the Canadian Wheat Board. Bill will provide marketing and logistical support to AGG's Management Team.

The Board looks forward to working with our new management team to reach the full potential of Canada's only rail connected Arctic trade corridor.

*Arctic Gateway Group Limited Partnership owns and operates the Port of Churchill, Hudson Bay Railway, Arctic Gateway Freight Services and Churchill Marine Tank Farm. AGG operates 627 miles of track serving industry and our northern communities.*
